### Strong Performance

- The Government encourages varied agricultural research and extension services, and local farmer organisations are involved in setting policy priorities. The extension system is effective and properly reaches out to poor farmers. Government policies, strategies and mechanisms seek to ensure gender equity in access to extension services.
- Relative to other HANCI countries, Niger's medium/long term national development policy (Plan de Développement Economique et Social) assigns strong importance to nutrition.
- Niger instituted a separate budget line for nutrition, enabling transparency and accountability for spending.
- The National Nutrition Policy/Strategy identifies time bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism has been set up.
- Policymakers in Niger benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2012.
- The Government has enshrined aspects of the International Code of Marketing of Breastmilk Substitutes into domestic law.
- The Government of Niger promotes complementary feeding practices and has achieved two high doses of vitamin A supplementation for 96% of children in 2013.

### Areas for improvement

- Spending on agriculture (9.67% of public spending in 2013) is close to, yet not fully meeting government commitments set out in the African Union's Maputo Declaration (10% of public spending).
- Niger's spending in its health sector (10.3% of public spending in 2012) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Niger, the law gives women and men equal economic rights and equal legal access to agricultural land. However, these laws are not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- Weak access to an improved source of drinking water (52.3% in 2012) and an improved sanitation facility (9% in 2012) prevents positive outcomes for hunger and nutrition in Niger.
- In Niger, constitutional protection of the right to food and the right to social security is weak.
- Civil registration rates are weak (63.9% in 2012) and potentially hold back children's access to critical public services such as health and education.
