

Key data for Tunisia

Existing rates of: Wasting: 2.8% Stunting: 10.1% Proportion of population underweight: 2.3%

Strong Performance

- Government of Tunisia has ensured tenure security for rural populations. Land titling is common and land markets function well. Policy promotes equitable access to common property resources.
- Tunisia has devised a National Nutrition Policy/Strategy.
- Policymakers in Tunisia benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2011-2012.
- The Government has enshrined aspects of the International Code of Marketing of Breastmilk Substitutes into domestic law.
- The Government of Tunisia promotes complementary feeding practices and has achieved two high doses of vitamin A supplementation for 100% of children in 2005.
- Strong access to an improved source of drinking water (96.8% in 2012) and improved sanitation facility (90.4% in 2012) drives better hunger and nutrition outcomes in Tunisia.
- In Tunisia 98.1% of women aged 15-49 were visited at least once during pregnancy by skilled health personnel in 2012.
- In Tunisia, constitutional protection of the right to social security is strong.
- Strong civil registration rates (99.2% in 2011-2012) potentially enable children's access to critical public services such as health and education.

Areas for improvement

- Spending on agriculture (4.85% of public spending in 2013), does not meet government commitments set out in the African Union's Maputo Declaration (10% of public spending).
- Tunisia's spending in its health sector (13.3% of public spending in 2012) is close to, yet not fully meeting government commitments set out in the African Union's Abuja Declaration (15% of public spending).
- In Tunisia, the law gives women and men equal economic rights and equal legal access to agricultural land. However, these laws are not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- Relative to other HANCI countries, Tunisia's medium/ long term national development policy (XIIème Plan de Développement) places weak importance to nutrition.
- Tunisia does not have a separate budget line for nutrition; this prevents transparency and accountability for spending.
- Even though Tunisia has developed a National Nutrition Policy/Strategy, clear time-bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism are still lacking.

Key data for Tunisia

Hunger Reduction Commitment Index (HRCI)

Public spending	Score*	Year	HRCI Rank of 45		
\$ Public spending on agriculture as share of total public spending 1	4.85%	2013	18th		
\$ Public spending on health as share of total public spending ¹	13.3%	2012	10th		
Policies					
Access to land (security of tenure) ²	Strong	2013	Joint 7th		
Access to agricultural research and extension services ²	Moderate	2013	Joint 27th
