

## Key data for Malawi

Existing rates of: **Wasting: 2.7%** **Stunting: 37.1%** **Proportion of population underweight: 11.7%**

Source: Government of Malawi (DHS, 2015-16)

### Strong Performance

- Spending on agriculture (17.6% of public spending in 2016) meets government commitments set out in the African Union's Maputo Declaration (10% of public spending).
- Relative to other HANCI countries, Malawi's medium/long term national development policy (Malawi Growth and Development Strategy III) assigns strong importance to nutrition.
- Malawi instituted a separate budget line for nutrition, enabling transparency and accountability for spending.
- The National Nutrition Policy/Strategy identifies time bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism has been set up.
- Policymakers in Malawi benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2015-2016.
- The Government of Malawi promotes complementary feeding practices.
- In Malawi 96.1% of women aged 15-49 were visited at least once during pregnancy by skilled health personnel in 2013-2014.
- In Malawi, constitutional protection of the right to food and the right to social security is strong.

### Areas for improvement

- Malawi's spending in its health sector (10.8% of public spending in 2015) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Malawi, the law gives women and men equal economic rights and equal legal access to agricultural land. However, these laws are not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- The Government of Malawi has achieved two high doses of vitamin A supplementation for only 16% of children in 2015.
- Weak access to improved sanitation facilities (55.1% in 2016) obstructs better hunger and nutrition outcomes.
- Social safety nets in Malawi are basic and only cover few risks for a limited number of beneficiaries.
- Civil registration rates are weak (67% in 2015-2016) and potentially hold back children's access to critical public services such as health and education.

## Hunger Reduction Commitment Index (HRCI)

Public spending	Score*	Year	HRCI Rank of 45
 Public spending on agriculture as share of total public spending <sup>1</sup>	 17.6%	2016	1st
 Public spending on health as share of total public spending <sup>2</sup>	 10.8%	2015	Joint 8th
<b>Policies</b>			
 Access to land (security of tenure) <sup>3</sup>	 Moderate	2016	Joint 19th
 Access to agricultural research and extension services <sup>3</sup>	 Moderate	2013	Joint 21st
 Civil registration system — coverage of live births	 67%	2015-2016	24th
 Functioning of social protection systems <sup>3</sup>	 Weak	2016	Joint 21st
<b>Laws</b>
