

Key data for Burkina Faso

Existing rates of: **Wasting:** 8.4% **Stunting:** 24.9% **Proportion of population underweight:** 17.7%

Source: Government of Burkina Faso (SMART,2018)

Strong Performance

- Spending on agriculture (10% of public spending in 2019) meets government commitments set out in the African Union’s Maputo Declaration (10% of public spending).
- The Government encourages varied agricultural research and extension services, and local farmer organisations are involved in setting policy priorities. The extension system is effective and properly reaches out to poor farmers. Government policies, strategies and mechanisms seek to ensure gender equity in access to extension services.
- Relative to other HANCI countries, Burkina Faso’s medium/long term national development policy (Plan national de développement économique et social (PNDES)) assigns strong importance to nutrition.
- Burkina Faso instituted a separate budget line for nutrition, enabling transparency and accountability for spending.
- The National Nutrition Policy/Strategy identifies time bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism has been set up.
- Policymakers in Burkina Faso benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2016.
- The Government of Burkina Faso promotes complementary feeding practices and has achieved two high doses of vitamin A supplementation for 99% of children in 2018.
- In Burkina Faso 92.8% of women aged 15-49 were visited at least once during pregnancy by skilled health personnel in 2015.
- In Burkina Faso, constitutional protection of the right to social security is strong.

Areas for improvement

- Burkina Faso’s spending in its health sector (10% of public spending in 2017) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Burkina Faso, the law does not give women economic rights equal to men. Men and women have equal legal access to agricultural land, but this is not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- Weak access to improved sanitation facilities (19.4% in 2017) obstructs better hunger and nutrition outcomes.
- Social safety nets in Burkina Faso are basic and only cover few risks for a limited number of beneficiaries.

Hunger Reduction Commitment Index (HRCI)

Public spending	Score*	Year	HRCI Rank of 45
 Public spending on agriculture as share of total public spending ¹	 10%	2019	Joint 8th
 Public spending on health as share of total public spending ²	 10%	2017	Joint 10th
Policies			
 Access to land (security of tenure) ³	 Moderate	2019	Joint 17th
 Access to agricultural research and extension services ³	 Strong	2019	Joint 6th
